FLOWMASTER

E110-R

THE "2 IN 1" FROM EUREKA

Save on investment and running costs with a sweeper-scrubber.

Cut costs using a combined on-board machine. The E110-R has been designed to sweep, scrub and dry contemporarily, all in a single pass.

The patented ECOsystem saves water and detergent, maximizing productivity while reducing costs and the environmental impact of cleaning. This technology provides three times more uptime for every tank refill, making the E110-R the ideal machine for daily cleaning operations.

The machine is fitted with two cylindrical brushes, which rotate at high speed, allowing you to sweep and scrub in a single pass. The brushes pick up debris and at the same time guarantee exceptional cleaning results.

Eureka's powerful drying system maximizes water pick up, leaving floors clean and completely dry. With the E110-R floors are immediately ready for traffic, without the risk of slip and fall accidents.

The E110-R is designed to work in tough applications. The machine is constructed with high quality materials to enhance performance, reliability, resistance, and durability over time.

With a 110 cm cleaning path and a forward speed of up to 8 km/h, the E110-R delivers an impressive hourly productivity rate of 8,800 m²/h.

It's versatile and can be used to clean both large areas and compact spaces.

SIMULTANEOUSLY SWEEPS AND SCRUBS

The E110-R sweeps, scrubs, and dries in a single pass, saving time, resources, and equipment

HIGH CAPACITY SOLUTION TANK

Boost uptime with ECOsystem technology, which increases the productivity of the high capacity 220 L solution tank by up to 3 times.

INTEGRATED DOSE-MATIC SYSTEM

Thanks to a simple control it's possible to personalize in real time the percentage of detergent according to the type of dirt present on the floor. Dose-Matic reduces detergent consumption by up to 50% and increases both productivity and the quality of cleaning results.

MAINTENANCE MADE EASIER

The components of the machine that require inspection and maintenance can be easily removed, without using tools.

FEATURES

- Simple and intuitive to use
- Quiet during operation
- ECOsystem as standard, with automatic cleaning cycle
- Front and rear lights included
- Traction motor protected against impact, dirt, and humidity
- Quick brush coupling / uncoupling
- Solution tank easy to refill
- FlowMASTER - 5 levels of cleaning solution flow, proportional to the forward speed of the machine
- Stainless steel debris collection basket
- DoseMatic automatic detergent dosing system with automatic circuit cleaning
- Recovery tank easy to clean and maintain
- Self-levelling splash guard with pre-scrub setting
- Adjustable squeegee, without the need for tools
- Squeegee blades can be used on 4 sides
- Maximum speed selector

REINFORCEMENTS FOR DIFFICULT ENVIRONMENTS

The optional overhead guard is made with thick steel to protect the operator and the machine against potential impact and stress.

ERGONOMIC CONTROLS

The ergonomic control panel is fitted with practical and intuitive controls, which allow the operator to access all the machine's functions directly from the driver's seat.

SIDE BRUSHES

Available on request, the side brushes extend the E110-R's cleaning path, increasing productivity, and making it possible to clean hard to reach areas.

ONEPASS DRYING SYSTEM

Eureka's drying system guarantees clean and dry floors, ensuring maximum safety and hygiene. The squeegee blades can be used on four edges and can be adjusted and changed without the need for tools.

ECOSYSTEM

This exclusive system which reuses cleaning solution, saves water, detergent, and hours of work, with significant savings on running costs.

VERSIONS

ECO – with ECOSystem as standard

APPLICATIONS

Industrial sites, local councils, schools, offices, hospitals, religious buildings, airports, ports, shopping centers, logistic centers, and contract cleaners.

SURFACES

Ceramic, marble, cement, linoleum, porcelain tiles, non-slip floors and rubber.

	E110-R
CLEANING PATH	1.100 mm
HOURLY PERFORMANCE	8.800 m ² /h
FORWARD SPEED	8 km/h
SOLUTION TANK	220 litres
RECOVERY TANK	240 litres
BRUSH PRESSURE	45 kg
WEIGHT with batteries and charger	1.200 kg
DIMENSIONS without squeegee (lxwxh)	1.940 x 1.150 x 1.640 mm
SQUEEGEE WIDTH	1.260 mm

PLUS

HIGH CAPACITY TANKS, EASY TO MAINTAIN / BRUSH DECK AND SQUEEGEE STAINLESS STEEL AS STANDARD / PARABOLIC AND ADJUSTABLE SQUEEGEE / EXCELLENT BATTERY AUTONOMY / DOUBLE VACUUM MOTOR / STAINLESS STEEL ANTI DUST FILTER PROTECTS VACUUM MOTOR / STAINLESS STEEL DEBRIS BASKET IN RECOVERY TANK / ONBOARD BATTERY CHARGER / POWERFUL TRACTION MOTOR IN PROTECTED POSITION / OPTIONAL DOUBLE SIDE BRUSH / SELF-LEVELLING SPLASH GUARD / ECOSYSTEM AUTOMATIC CLEANING
